Summary

Frontend Developer with 5 years of experience building scalable, high-performance web applications using **Angular, TypeScript, JavaScript (ES6+), HTML5, and CSS3**. Experienced in developing responsive user interfaces, integrating RESTful APIs, and delivering enterprise-grade solutions across healthcare, government, and business domains. Skilled in designing reusable components, optimizing application performance, and translating complex business requirements into intuitive user experiences.

Possesses hands-on experience with **NestJS, Node.js, PostgreSQL, TypeORM, Microservices, API Gateway, JWT Authentication, and Docker**, enabling effective collaboration across full-stack development initiatives. Strong advocate of clean code, Agile methodologies, and cross-functional teamwork, with a proven ability to deliver secure, maintainable, and scalable software solutions.

Education

Annamalai University

M.sc - Computer Science • Chidambaram, Tamilnadu

01/2026

PG Academic Project: Alumni Information Database Management System

- Developed a Java-based CRUD application for managing alumni profiles and records.
- Implemented database connectivity using JDBC for efficient data operations.
- Designed relational database schemas using MS Access and SQL Server.
- Built search, validation, and reporting functionalities.

Annamalai University

B.A - English & Communications • Chidambaram, Tamilnadu

12/2018

Business Communication, Structure of Modern English, Communication Skills in English and Linguistics

Experience

PARTICLE BLACK INDIA PVT. LTD.

Software Developer • Chennai, Tamilnadu

06/2022 - Present

- Developed and maintained scalable **Angular (v2+)** applications using **TypeScript**, implementing modular and reusable components that improved UI maintainability by **30%** and reduced code duplication by **25%**.
- Designed responsive, cross-browser compatible user interfaces using **HTML5, CSS3, SCSS, and Angular Material**, improving compatibility across devices by **35%**.
- Integrated secure third-party services including **Stripe Payment APIs, Twilio SMS APIs**, and implemented authentication using **SAML and AWS Cognito**.
- Implemented real-time features using **Socket.IO** and integrated collaboration tools such as **Jitsi and OnlyOffice**.
- Built dynamic dashboards and reporting modules using **Highcharts, ApexCharts, Chart.js, and Superset**.
- Developed dynamic form solutions using **FormioJS**, advanced data grids with **AG-Grid**, and enterprise UI components with **PrimeNG and Syncfusion**.
- Developed and maintained backend services using **NestJS, Node.js, and TypeScript**, building **RESTful APIs and microservice-based solutions**.

- Designed **API Gateway** integrations and implemented secure **authentication** and **authorization** using **JWT** and **Passport.js**.
- Built database-driven features using **PostgreSQL** and **TypeORM**, including **entity modeling**, **data validation**, and **API integration**.
- Created API documentation using **Swagger/OpenAPI** and containerized services using **Docker** for consistent development and deployment workflows.
- Optimized application performance, debugging production issues and resolving bottlenecks, reducing UI-related defects by **40%**.
- Collaborated within Agile/Scrum environments, participating in requirement analysis, sprint planning, and client discussions to deliver high-quality solutions.
- **Projects Involved** : TAC Healthcare application, Child Welfare- Wyoming, ECMS- Indiana DCS, NextG Website, Passing Porter Application, Thereafter Website and PB Website

Elixir Softlab Solutions Pvt. Ltd.(Cardinality.ai)

Junior Software Developer • Chennai, Tamilnadu

07/2021 - 05/2022

- Accelerated **Angular feature delivery** by ~20% through efficient development and testing practices.
- Achieved **100% design compliance** by converting wireframes into fully responsive UIs.
- Integrated **RESTful APIs**, ensuring **stable and seamless data flow** across applications.
- Implemented **on-page SEO and UI structure optimization**, improving visibility and usability.
- Designed **reusable UI components/libraries**, reducing development effort by ~25%.
- Built and maintained **unit/integration tests** and contributed to **technical documentation** for better maintainability.
- Gained hands-on experience with **CI/CD pipelines**, supporting automated builds and deployments.
- Applied **async programming, code reviews, and Agile practices** to improve performance and code quality.

Languages

English, Tamil, Malayalam

Certifications

Postman API Fundamentals Student Expert, Legacy Responsive Web Design V8, Scrum Fundamentals Certified, Kanban Essentials with AI Certified, Six Sigma Yellow Belt, Google Analytics Certification, Fundamentals of Artificial Intelligence, ChatGPT, Claude 101, Claude Code in Action, AI Capabilities and Limitations, AI Fluency Framework & Foundations, Building with the Claude API, Introduction to Model Context Protocol (MCP), Business Analysis Fundamentals with AI Certified, OKR Fundamentals with AI Certified, Negotiation Associate

Technical Expertise

Frontend Frameworks & Libraries : Angular (v2+), React, TypeScript, JavaScript (ES6+), jQuery, FormioJS

UI Components, Styling & Visualization : Angular Material, PrimeNG, Syncfusion, Bootstrap, SCSS/SASS, AG-Grid, Highcharts, ApexCharts, Chart.js, FullCalendar

Backend & API Development : NestJS, Node.js, Express.js, RESTful APIs, Microservices Architecture, API Gateway, Swagger, Axios

Database Technologies : PostgreSQL, TypeORM

Integrations & Third-Party Services : Stripe, Twilio, Socket.IO, Jitsi, OnlyOffice, Superset, Miniature Earth

Authentication & Security : AWS Cognito, SAML, JWT Authentication, Passport.js, Encryption/Decryption, Helmet, API Rate Limiting

Development Tools & Practices : Git, Jira, Figma, Docker, Responsive Web Development, HTML5, CSS3, jsPDF, DTO Validation, Environment Configuration, Agile/Scrum
